

ENCLOSURE DESIGN & MANUFACTURE...

TRUSTED FOR 50+ YEARS

STANDARD ENCLOSURES

Explore our wide range of off-the-shelf enclosures in multiple colours, sizes, and configurations. Designed for use in all applications and industries, such as IoT, Sensor, IP-rated, and DIN Rail.

PLASTIC FABRICATION

Custom enclosures built in-house via our tool-free process, giving you flexibility for low-cost design changes, reduced time to market, and no restriction on size or quantity. Your partners in innovation at any or every stage of your project!

ACCESSORIES

Find the right accessory for you, from cable glands to pressure vents to ensure your product is protected and dozens of accessories for our standard ranges to meet your specific application.

**DESIGNED
& MADE
IN THE UK**

CUSTOM MOULDING

Start your journey by sending us your concept or design. Our expert design engineers can take over and refine your custom enclosure, generating a 3D prototype before final approval and tool development. Volume manufacture then begins with our in-house machines, scaled up to your required quantity.

CUSTOMISATION

All our enclosures, whether standard or custom made, can be customised with digital printing for branding, CNC machining for cutouts to meet your connectivity requirements, and even engraving to get the exact unique look of your product.

COMPONENTS

Explore a comprehensive collection of components, including terminal blocks in standard, screwless, pluggable, or DIN Rail variants, IP68 circular connectors, switches, fuses, fuseholders, and much more.

CAMDENBOSS®
